SUMMARY

AI & Full Stack Software Engineer with 1.5+ years of professional experience building, testing, and deploying scalable production applications using React.js, Next.js, TypeScript, Node.js, NestJS, Express.js, Python, and FastAPI. Experienced in designing RESTful and GraphQL APIs, scalable backend architectures, authentication and RBAC, database design, third-party integrations, cloud deployments, and application performance optimization. Hands-on experience building AI/LLM-powered applications and integrating Python-based AI services with Node.js backends, with practical knowledge of RAG, LangChain, LLM APIs, embeddings, and vector search. Experienced with AWS, Docker, Kubernetes, CI/CD, automated testing, observability, and production deployments, with a strong focus on maintainability, security, scalability, and reliable software delivery.

EDUCATION

Suryadatta Institute of Business Management and Technology, Pune

Master of Computer Applications (MCA)

2025

Pune University

Bachelor of Commerce (B.Com)

2022

EXPERIENCE

Full Stack Developer

July 2025 – Present

Brilliantech Software Pvt. Ltd.

Pune, India

- Designed and developed scalable production web applications using React.js, Next.js, TypeScript, Node.js, NestJS, and Express.js, following modular architecture and modern full-stack engineering practices.
- Built modern Next.js applications using App Router, Server-Side Rendering (SSR), Server Components, API integration, and performance optimization techniques.
- Designed and implemented secure RESTful and GraphQL APIs with authentication, authorization, RBAC, request validation, error handling, pagination, and optimized database access.
- Designed modular backend architectures and reusable services for multi-tenant and role-based workflows, with a focus on scalability, maintainability, and separation of concerns.
- Designed and optimized PostgreSQL and MongoDB data models using TypeORM/Prisma and implemented Redis caching to improve application performance and reduce database load.
- Implemented secure authentication using JWT, RBAC, session management, and HTTP-only cookies across multi-role application workflows.
- Integrated third-party services including Stripe, Razorpay, Cashfree, SendGrid, Twilio, Zoom API, Calendly, and Cloudinary, with structured error handling and reliable API communication.
- Containerized applications using Docker and deployed production services across AWS, Linux servers, Vercel, and DigitalOcean, including cloud storage and server configuration.
- Worked with Kubernetes for container orchestration and deployment of containerized application services.
- Implemented and maintained CI/CD pipelines supporting automated builds, testing, and deployment workflows.
- Developed and maintained unit, integration, and API tests for critical application workflows and backend services.
- Implemented application logging, monitoring, error tracking, and performance analysis to troubleshoot production issues and improve application reliability.
- Optimized API performance through database query optimization, caching, asynchronous processing, and efficient backend architecture.

- Collaborated in Agile development environments, participating in technical design discussions, code reviews, debugging, production deployments, and performance optimization.

Software Developer

Techonsy Software Pvt. Ltd.

January 2025 – June 2025

Pune, India

- Developed Learning Management System modules using Angular, Express.js, and MongoDB, supporting course delivery, user management, and progress tracking.
- Implemented authentication, authorization, session management, and role-based access control.
- Designed and optimized REST APIs and MongoDB queries for high-traffic application workflows.
- Participated in testing, debugging, code reviews, Git-based development workflows, CI builds, and deployment activities.
- Collaborated with the development team to troubleshoot application issues, improve API performance, and maintain application reliability.

PROJECTS

Ad Monetization Platform | React.js • Express.js • PostgreSQL • Redis

- Built an advertisement management platform with an analytics dashboard for real-time campaign performance tracking.
- Implemented Redis caching to reduce database load and optimized API response times for high-volume reporting modules.
- Designed backend APIs and database workflows supporting campaign management, reporting, and analytics.

Vendor Verification & Fraud Detection Platform | Next.js • NestJS • PostgreSQL • TypeORM • JWT

- Developed a scalable platform for vendor onboarding, document verification, identity verification, and fraud-detection workflows with role-based access control.
- Designed modular backend services for vendor management and risk assessment and integrated multiple third-party services with comprehensive error handling.
- Implemented secure authentication and authorization workflows and designed maintainable PostgreSQL data models using TypeORM.
- Built production-ready services supporting document processing, verification workflows, notifications, and administrative operations.

Production Website – Canextgen | Next.js • TypeScript • Tailwind CSS • Vercel • Web3Forms

- Developed and deployed a responsive, SEO-optimized production website using Next.js and TypeScript, hosted on a custom domain through Vercel.

Production Website – Everlogic Consulting | Next.js • TypeScript • Tailwind CSS • Vercel • Web3Forms

- Built and deployed a full-stack production application with authentication, dashboard modules, REST APIs, and database models.

Production Website – BeVerifyd | Next.js • TypeScript • Tailwind CSS • Vercel • Web3Forms

- Developed and deployed a responsive production web application with modern UI, third-party API integrations, and database services on a custom domain.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Frontend: React.js, Next.js, Next.js App Router, Server-Side Rendering (SSR), Server Components, HTML5, CSS3, Tailwind CSS, Bootstrap, Shadcn/UI

State Management & Libraries: TanStack Query, Zustand, React Hook Form, Zod

Backend: Node.js, Express.js, NestJS, Python, FastAPI, Django, REST APIs, GraphQL, Microservices, Socket.IO

AI / Generative AI: LLM Integration, Generative AI, RAG, LangChain, Prompt Engineering, Embeddings, Vector Search, AI Application Development

Databases: PostgreSQL, MongoDB, MySQL, Redis, SQLite, Vector Databases

ORMs & Data Access: Prisma ORM, TypeORM, Sequelize

Authentication & Security: JWT Authentication, RBAC, Session Management, HTTP-Only Cookies, API Security

Cloud & DevOps: AWS, EC2, S3, SES, Docker, Kubernetes, Linux, Nginx, Vercel, DigitalOcean, CI/CD, GitHub Actions

Testing & Quality: Unit Testing, Integration Testing, API Testing, Automated Testing, Jest, Postman

Architecture & Engineering: System Design, Scalable Architecture, Microservices Architecture, Modular Architecture, API Design, Performance Optimization, Caching, Error Handling

Observability: Application Logging, Monitoring, Error Tracking, Performance Monitoring, API Monitoring, Production Debugging

CMS & Integrations: Strapi CMS, Payload CMS, Stripe, Razorpay, Cashfree, SendGrid, Twilio, Zoom API, Calendly

Tools: Git, GitHub, Swagger/OpenAPI, Postman

CORE COMPETENCIES

Full Stack Development • AI Application Development • React.js • Next.js • TypeScript • Node.js • NestJS • Python • FastAPI • REST API Development • GraphQL • System Design • Scalable Architecture • Microservices • AWS • Docker • Kubernetes • CI/CD • Automated Testing • LLM Integration • RAG • LangChain • Database Design • PostgreSQL • MongoDB • Redis • Authentication & Authorization • RBAC • API Security • Performance Optimization • Observability • Cloud Deployment • Third-Party API Integration • Payment Gateway Integration • Agile Development • Git & Version Control
